### Conservation Groups Need Your Oyster Shells as Restaurants Remain Closed Due to COVID

Since then we've planted over 300million oysters into the the Chesapeake Bay's Harris Creek, one of the 20 tributaries selected for restoration in support of President Obama's Executive Order to restore oyster habitat and populations. This small population is not on the bottom, but suspended in the water column.

### Lowcountry Living Shorelines: Restoring Carolina's Reefs

I dream about sitting at a white cloth-covered table in the middle of the ocean enjoying oysters freshly pulled from the ocean and shucked in front of me. You can eat oysters or take a zinc tablet — I know what I would rather do! Fishermen objected, arguing that the law would allow wealthy investors to acquire leases on the best oyster beds in the state and manage them as private property.

### Easy Rosé oyster dressing

X-ray diffraction XRD analysis of pyrolyzed oyster shells showed peaks that were characteristic of calcium oxide, whereas analysis of raw oyster shells showed peaks that were characteristic of calcium carbonate. The water flows and salinity may have shifted somewhat, but exactly how is hard to say.

### ORP E

Shellfish Reefs at Risk: A Global Analysis of Problems and Solutions. It's now that time of year when local tributaries with support from DNR and ORP begin to gather the cages of growing oysters to place then on local sanctuaries. Oysters are a good source of Magnesium and Phosphorus, and a very good source of Protein, Vitamin D, Vitamin B12, Iron, Zinc, Copper, Manganese and Selenium.

### Conservation Groups Need Your Oyster Shells as Restaurants Remain Closed Due to COVID

It did not fit with the text but was too beautiful to leave out.

**Saving the Planet One Oyster at a Time** oysters are wicked cool. If looked

On October first at 1:00-4:00 we will be placing oysters on the bottom at the mouth of the Charles River. Reefs lined the shores and inlets of Manhattan, Brooklyn, Queens, Staten Island, and City Island.

### **Conservation Groups Need Your Oyster Shells as Restaurants Remain Closed Due to COVID**

Back here in New England, the oysters placed by the Mass Oyster Project are within direct line of site of a State Police Marine facility, so hopefully this would allay concerns of poaching within our regulatory authority.
