## Water Quality

Spatial and temporal trends were identified, an assessment made of the beneficial use of the water and any areas at

Filesize: 26.24 MB

risk to groundwater quality deterioration were identified.

## Monitoring and Assessing Water Quality

During the last decade, more than 8000 samples have been analysed.

## IDEALS @ Illinois: Peoria

The data obtained from the chemical analysis is key for the further classification, analysis, correlation etc.

## Groundwater

Since then, NAWQA has produced scientific data and knowledge that is used by national, regional, state, and local agencies to develop science-based policies and management strategies to improve and protect water resources used for drinking water, recreation, irrigation, energy development, and ecosystem needs. The chemical parameters of groundwater play a significant role in classifying and assessing water quality.

## Groundwater

This inference was also confirmed by Geophysical studies. A Unit Office of CGWB was started in 1978 at Trivandrum under the Southern Region, Hyderabad.

## Graphical presentation and classification for assessment of Ground wa...

Groundwater-quality data were collected from 648 wells as part of the National Water-Quality Assessment Project of the U.
