Difference Between Internal and External Business Environment

Implementing economically viable recycling technologies can shorten supply chains, increase resilience and create new jobs, while reducing additional demand for virgin materials. All tests and results should be fully documented as part of the batch record.

Packaging Development and Design

An API starting material can be an article of commerce, a material purchased from one or more suppliers under contract or commercial agreement, or produced in-house. Records should be maintained of these conditions if they are critical for the maintenance of material characteristics. Improve energy efficiency and electrification: Investment in energy efficiency would create on average around 10 jobs per million dollars spent.

2020 business trends for food and beverage companies

The cleaning validation protocol should describe the equipment to be cleaned, procedures, materials, acceptable cleaning levels, parameters to be monitored and controlled, and analytical methods.

2020 business trends for food and beverage companies

However, if the same equipment is to be used, the equipment should be appropriately cleaned and sanitized before reuse. Audit findings and corrective actions should be documented and brought to the attention of responsible management of the firm.

Packaging Development and Design

Our senior industry analysts shared their insights on several emerging topics in the industry.

2020 business trends for food and beverage companies

In particular, centralization of decision making appears to be necessary for radical process adoption along with the movement away from complexity toward more organizational generalists.
