Water

Such consultations shall include participation by interested states, provinces, and agencies. Also, severe habitat degradation occurred in the lake, caused mainly by erosion and siltation associated with extensive deforestation of its watershed.

Environmental & Wildlife Treaties & Agreements to Which Canada is a Signatory Party

This kind of facility has a large effect on the seasonal variation of below-dam riverflow, because it greatly reduces the spring peak flow while increasing the flow during the summer, fall, and winter Figure 20.

Canada

They alluded that the real reason for PRIME was to export water to the US. Fresh water from these bodies can be used for drinking, cleaning, agricultural irrigation, generation of hydroelectricity, industrial cooling, and recreation. Large Dams: Learning from the Past; Looking at the Future: Workshop Proceedings.

View Treaty

It would eventually ignite a controversy over a proposed golf course to be built by the town of Oka in 1990.

Canada

The damage to the environment done by the first phase of the project has left 13,000 square kilometres of Cree territory flooded. A particularly high-profile demonstration was held to confront a press conference staged by the governments of Québec and Newfoundland in March of 1998,

near the village of Churchill Falls, where their premiers jointly announced a new plan for a hydro development on the Lower Churchill River. In addition, Canada manages the flow of tremendous quantities of surface water using dams and reservoirs see Chapter 20.

Agreement between the Government of Canada and the Government of the United States of America for water supply and flood control in the Souris river basin

Others note that they could also be vital components of the biggest pipe dream of them all: the Great Recycling and North Development GRAND Canal water-transfer project.

Environmental & Wildlife Treaties & Agreements to Which Canada is a Signatory Party

Any shortfall that exists as of that date shall be delivered by Saskatchewan prior to December 31.

2008

If so, we must accept that it is fraught with issues that can be ignored only at our peril.
