## Reading National Geographic, Lutz, Collins

That however is probably the only thing that you really need to know about NG. The authors problematize NG's systematic misrepresentation of the non-West and examine how those misrepresentations resonate with its 'American' audience through reinforcing the self-other binary. For its millions of readers, the National Geographic has long been a window to the world of exotic peoples and places.

And how sad that it's still more common for women to be dismissed by their male colleagues. Despite somewhat heavy use of academic jargon at times, they provide enough detail, through interviews with staff members, readers, and others, to give a good sense of the goals and philosophy underlying those beautifully illustrated stories. March 2008 Iceland's Power Struggle, The God Particle, Pioneers of the Pacific, and Bhutan's Experiment: all equally interesting.

What a neat word, and what interesting little creatures. Even worse, the NG's practice goes so far as to abet war-making on the people it purposefully misunderstands. This account of an American institution explores the possibility that the magazine, in purporting to teach about distant cultures, actually tells us much more about our own.

There three methodological steps are to look at the process of producing the images a social endeavor over which no individuals have total say throughout the process , examine the structure and content of the images, and identify how readers view the photographs. The result is a complex portrait of an institution and its role in promoting a kind of conservative humanism that acknowledges universal values and celebrates diversity while it allows readers to relegate non-Western peoples to an earlier stage of progress. It is shallow and leans heavily towards a feministic cultural critique; it's also narrow in that it mostly looks at how NG depicts cultures.
