China's Policies for Minority Nationalities in Higher Education: Negotiating National Values and Ethnic Identities on JSTOR

Since the mid- 1980s, when China started a large-scale help-the-poor drive in an organized and planned way, the state has always attached importance to helping the minority peoples and minority areas. During the help-the-poor efforts in the past decade or so, poverty-stricken minority areas have enjoyed the preferential help-the-poor policy offered by the Chinese government to other poverty-stricken areas, as well as a series of special policies formulated by the state: 1 Expanding the sphere of aiding the minority areas. Some ethnic minorities in China live in what are described as. For instance, they have the rights to vote and stand for election, regardless of ethnic status, race and religious belief; their personal freedom and dignity are inviolable; they enjoy freedom of religious belief; they have the right to receive education; they have the right to use and develop their own spoken and written languages; they enjoy freedom of speech, of the press, of assembly, of association, of procession and of demonstration; they have the right to engage in scientific research, literary and artistic creation and other cultural pursuits; they have the right to work and rest, and the right to material assistance from the state and society when they are disabled; they have the right to criticize and make suggestions regarding any state organ or functionary; and they have the freedom to preserve or change their own folkways and customs 4.
