## Mastering Excel on the Macintosh (1989 edition)

In our new book, you'll find a number of tutorials on how to get more out of spreadsheets.

### 19 tips for nested IF formulas

The is one of the most heavily used functions in Excel. You can paste the formula back into Excel after you've straightened things out.

And with add-ons and integrations, you can add any extra features you want to your spreadsheet.

### 19 tips for nested IF formulas

Everybody wants to learn them. On the downside, boolean logic can be be confusing to people who aren't used to seeing it. That little box where the row headings and column headings meet can be used to select the entire sheet, if you click on it.

## Mastering Excel on the Macintosh (1989 edition)

Most importantly, though, Excel Online now lets you connect your spreadsheet with other web apps to gather data and start automated workflows—and since it syncs with traditional Microsoft Excel, you can use the Online version to add automations to any spreadsheet. There are dozens of ways you can use integrations like these to save data to your Excel spreadsheet automatically and get work done right from your spreadsheet. Add line breaks make nested IFs easy to read When you're working with a formula that contains many levels of nested IFs, it can be tricky to keep things straight.

### 19 tips for nested IF formulas

If you've used Excel for years, switching to a web app may sound scary.

## **Mastering Excel Date & Time: Serial numbers, Networkdays, Datevalue, and more**

Or, it can search through your spreadsheet, add a new row, or even update existing rows in your spreadsheets. Excel is synonymous with spreadsheets, and for good reason. As with all my other lessons, this one has a follow along workbook that you can use to work through the exercises.

### **19 tips for nested IF formulas**

You can add a comment to a cell, show or hide the comments sidebar, or edit and delete any comments already on the spreadsheet. Like most people, you'll start with great enthusiasm and vigor but after a few chapters, the novelty wears off. And—with the Business versions of Office 365, for now—you can use to connect your spreadsheets to your favorite apps.
