Measuring the quality of healthcare in the U.S.

Healthcare spending by Federal, State, Tribal, local, and territorial governments will be greater than that of private businesses, households, and other private payers due to growth in Medicare enrollment and continued government funding dedicated to subsidizing premiums for lower-income enrollees of health insurance exchanges under current law. For example, slamming equipment around is red-flag behavior. This study shows only that there are more than six million high-deductible health plans HDHPs which meet the qualifications to establish a health savings account.

Summary

October 08, 2008 Asking whether health care is a privilege or a right often leads to a not very productive 'tis so, 'tis not debate.

The ability to make a living wage is a concern for many doulas, particularly doulas of color, who often serve low-income women of color who do not have the ability to pay for their services.

Summary

June 26, 2009 Wendell Potter, a former CIGNA executive, provides an insider's view as to what type of behavior we can expect from the private insurance industry after reform is enacted.

Physicians for a National Health Program

February 27, 2009 Primarily because of political perceptions, Len Nichols continues to support what he believes to be the pragmatic approach of covering everyone with regulated private plans. Journal of American Medical Association, 308, 2252-3. In 2010, the comprised nearly 295,000 primary care professionals, including more than 208,000 physicians, more than 55,000 nurse practitioners, and more than 30,000 physician assistants.

Evidence

Monthly Labor Review 2002;125 5 :15—28. Overlapping with the changing social demographics is the change in disease-type demographics due to the fact that there is a rise in chronic disease among Americans and significantly so among older Americans.

Measuring the quality of healthcare in the U.S.

The practice has been referred to by a number of social justice organizations as an unconstitutional human rights violation and can be viewed as a form of obstetric violence. It is about improving the physical and mental health outcomes and wellbeing of people within and across a defined local, regional or national population, while reducing health inequalities.

Evidence

Through better benefits management, employers can reduce benefits costs while still providing value to their employees. Transcutaneous Electrical Nerve Stimulation TENS provides low voltage electricity to the body via electrodes placed on the skin. August 31, 2009 What's beautiful about the Medicare Advantage program is that it has provided us with a real-life laboratory experiment which allows us to compare the functioning of highly-regulated private insurance plans as contrasted with the functioning of a public insurance program: traditional Medicare.
