## Contaminated-Land Information and Guidance: User Evaluation, Water and Environment Journal

After completion of remediation for any identified contaminated areas, no residual impact in respect of land contamination on the future users is anticipated.

### January 2015 CivicSD Board Meeting Approved Drawings

. Also, it cannot be assumed that chemicals have the same effect on all individuals. Roles and responsibilities Clear roles and responsibilities minimise the risk of overlap and duplicated effort.

## Soil

However, the lack of compliance monitoring activities associated with contaminated sites has led to no or very limited appropriate and timely enforcement actions. Braul, personal communication, 1993, see also British Columbia 1993b, the fundamental issue is whether the criteria are an appropriate solution to the question of acceptable risk in contaminated site problems. The site is known to be contaminated due to the past quarrying history, resulting in soil contamination and vapours.

## Leaking Underground Storage Tanks Corrective Action Resources

In British Columbia, it means a willingness to move beyond traditional techniques, such as the public hearing process, which is largely after the fact in most planning and environmental debates, and work towards incorporating the lay public and other stakeholders more effectively. One of the recreation centres is used by older people, while the other is used for outside school hours care.

## Managing Contaminated Sites

Category one, questions numbered 1 through 10, looked for background information on contaminated sites in the municipality. However, this too raises a number of questions and concerns.

### **Soil**

Funding Addressing contamination can be expensive. Recommendations were made to ministers on four occasions between 2000 and 2007.

### **Contaminated Land**

The structures under construction were previously approved under a ministerial building permit and found to be in conformance with the approved entitlements as referenced above in regards to density.
