Google Scholar includes journal and conference papers, theses and dissertations, academic books, pre-prints, abstracts, technical reports and other scholarly literature from all broad areas of research. The researcher who chooses a causal question needs to identify plausible explanations or theories to test and to decide on a strategy for collecting and analyzing data that could falsify or disconfirm explanations.

### Guides and resources

Introduction The growing concern of students, scholars, and the general public to understand ethnic conflict, cultural diversity, and global problems has generated a demand for educational and research programs emphasizing the worldwide, comparative study of human behavior and society. The OCM subjects are clearly defined in the OCM, but a few are essential to effective use of the HRAF Collection of Ethnography and bear mentioning here. Details can be reviewed at the.
