## Le Corbusier

Le Corbusier's insistence on the utility of his model, thereby exposing the crass commercialization of the rest of the fair, no doubt contributed heavily to the exposition's directors' attempts to cordon off his pavilion behind a barrier until an injunction from the Ministry of Culture lifted it. It is a sign of the abiding strength of the totalitarian temptation, as the French philosopher Jean-François Revel called it, that Le Corbusier is still revered in architectural schools and elsewhere, rather than universally reviled.

## Spotlight: Le Corbusier

His father wanted him to follow in his footsteps; but as an adolescent, Le Corbusier showed precocious artistic ability, attended the local school of fine arts for a time, and then wandered Europe for several years in a program of aesthetic self-education. At the Chapelle Notre-Dame-du-Haut, the management system needs strengthening to ensure the security of the site. Overall, the modifications can be seen to be reasonable and proportionate.

## Spotlight: Le Corbusier

A cathedral interests us as an ingenious solution to a difficult problem, but a problem of which the postulates have been badly stated because they do not proceed from the great primary forms. The 20th century was one of the more divisive eras in architectural history, with pioneers like Frank Lloyd Wright, Ludwig Mies van der Rohe, and Walter Gropius paving the way for modernism—sometimes to the distaste of critics and the public.

## See Le Corbusier's Complete Works

Le Corbusier's first large-scale housing project. The independence between the base and the tubular steel frame allows for multiple degrees of reclining, emphasizing the chair's multifunctionality and thus its ideal degree of utility. It illustrated his belief that industry, through the standardization required for mass-production, could create the buildings necessary for modern living.

## The Architectural Work of Le Corbusier, an Outstanding Contribution to the Modern Movement

Concrete, glass, steel - Marseille, France 1950-55 Chapelle Notre-Dame-du-Haut In 1950, Le Corbusier was invited to design a new Catholic pilgrimage chapel in Ronchamp, a small French town in the Vosges Mountains near the Swiss border, to replace the one that had been destroyed during World War II.
