## dependency theory

An empirical analysis of cross-national economic growth, 1951-1980. A number of essays included were especially written for this volume, but the majority have appeared previously in various journals or books, not all easy to obtain.

**Hodges, Donald C. 1923**

Prebisch and his colleagues were troubled by the fact that economic growth in the advanced industrialized countries did not necessarily lead to growth in the poorer countries. *Econometrica*, 55 2, 251-276. *Econometrics and Data Analysis for Developing Countries*.

**Theory: An Vincent Ferraro, Mount Holyoke College, July 1966**

Boston: Porter Sargent, 1971, p.

**Hodges, Donald C. 1923**

Prebisch's initial explanation for the phenomenon was very straightforward: poor countries exported primary commodities to the rich countries that then manufactured products out of those commodities and sold them back to the poorer countries. He argues that Sandino's eclectic communist spirituality was more of an asset than a liability for understanding the human condition, and that his spiritual politics promises to be more relevant than Marxism-Leninism for the twenty-first century. *Private investment and economic growth in developing countries*.

**Theory: An Vincent Ferraro, Mount Holyoke College, July 1966**

Government and economic growth: a non-linear relationship. The critics of capitalism continuously argue that the mass of people in Africa and Asia are literally starving to death on a daily basis, as a result of the globalization of capitalism and its exploitation of the working classes of these

regions. The most explicit manifestation of this characteristic is in the doctrine of comparative advantage.
