National Statement on Ethical Conduct in Human Research (2007)

Rules and Regulations Seventeen federal agencies have regulations governing the conduct of research involving human subjects. In some situations, regard for the beliefs, customs and cultural heritage of participants will require recognition of values other than those of this National Statement.

Psychology Research Ethics

These forms of misconduct may, of course, also lead to potential harms to participants.

The Belmont Report: Three principles for ethical research

This means you must not embarrass, frighten, offend or harm participants.

Ethical Principles in the Conduct of Research with Human Participants

For example, if studying children, make sure their participation is brief as they get tired easily and have a limited attention span.

Ethical Guidelines, Federal Regulations and State Statutes

Many kinds of possible harms and benefits need to be taken into account.
