## Research Abstract of the Project for Environmental Pollution Control in Japan

Effects of Air Pollution on Plants Air pollution injury to plants can be evident in several ways. The primary focus of air pollution regulation in industrialized countries has been on protecting ambient, or outdoor, air quality.

## Air pollution final.ppt

Secondary Pollutants The pollutants formed by the intermingling and reaction of primary pollutants are known as secondary pollutants. These devices are described below.

## Air pollution in Ontario, Canada during the COVID

Other substantial sources of outdoor air pollution include gas stations, industry, agriculture, and forestry.

## Introduction to Air Pollution and Its Control

Outside, though the air may seem polluted, it's constantly moving and in theory at least pollutants are continually being diluted and dispersed. Wikipedia's article on the gives a comprehensive account of what happened. As you know, humans and other living creatures rely on the atmosphere for respiration.

## Air pollution control

The smell from the newly painted walls is the smell of the chemicals present in the paints. Air pollution can make people sick, make things dirty, damage buildings and our ecosystem, change the weather, trap heat and make the air warmer than it should be, chew holes in the atmosphere and mix with clouds to form poisonous acid rain.

## Health effects of air pollution

You can see the trouble this may cause.

## **Automobile emissions control**

Pollution has been known to cause allergies, disease, damage to crops, and in extreme cases, even death. In March of 2020, the province of Ontario declared a State of Emergency SOE to reduce the spread of severe acute respiratory syndrome coronavirus 2 SARS-CoV-2 , which causes the coronavirus disease COVID-19.

## **Air Pollution**

Other ways include taking public transportation, carpooling with friends and colleagues, or even riding a bike to your destination. EPA as — criteria meaning that the concentrations of these pollutants in the atmosphere are useful as indicators of overall air quality.
