Vegetative rehabilitation of arid land disturbed in the development of oil shale and coal. Final report 1975

Wagering the Land is an important book because it forces one to confront the remarkably varied, complex, and site-specific causes of long-term environmental change. Commercial development will lead to environmental impacts which must be controlled if oil shale is to be developed in an environmentally sound manner. We developed a soil quality index in arid and semi-arid ecosystems of the Western US impacted by.

Vegetative rehabilitation of arid land distributed in the development of oil shale and coal / by C. M. McKell and Gordon Van Epps

Calculate risked, technically recoverable shale gas and shale oil resource TRR. The primary effort of the vegetation management project during FY 1980 was directed toward the development of cost effective methods of restoring native vegetation on disturbed Mojave Desert land. Cooperative Research, Industrial Environmental Research Laboratory Cincinnati, Ohio , Industrial Environmental Research Laboratory Cincinnati, Ohio.
