Chemical data and statistical interpretations for rocks and ores from the Ranger uranium mine, Northern Territory, Australia

In either case, grade control is usually achieved by measuring radioactivity as a surrogate for uranium concentration.

PGC Publishing

Long-lived intermediate-level category S wastes will be stored above ground in an

They are not given the opportunity to have discussions with people who have other ideas about the whole mining industry such as the uranium industry.

Land application of mine water causes minimal uranium loss offsite in the wet

In the 1970s, when the Ranger mine opened, the Mirarr people felt largely powerless in negotiations between mining companies and the federal government. This has led to people mobilising internationally.
