## An End to Aging: Can Science Allow Humans to To Become Immortal?

For these and other reasons, clinically, death is defined today as an absence of brain activity as measured by. This is why we die. These are only some of the most advanced RNA therapies.

### The Living End

However, life expectancy of people at birth has increased dramatically in last 200 years.

## Ageing process is unstoppable, finds unprecedented study

I want to extend health.

### Aging Well: Facing the Fact of Mortality

And this is just the beginning. Only by recognising that death is part of life and that many people experience a living death at the end of life, can we make sensible decisions about whether people should be allowed to choose a dignified exit from life.

## An End to Aging: Can Science Allow Humans to To Become Immortal?

The decline of infections, starvation, warfare, heart attack and stroke has allowed people to reach extreme old age - yet ushered in disability, dementia and degenerative disease, with profound consequences for the self and society. . We know very little about this phase of life, but this is the fastest growing fraction of the population.
