

# Sandstone reservoirs and stratigraphic concepts - selected papers.

## American Association of Petroleum Geologists - Sandstone Reservoir

Description: -

-

Arctic regions -- Discovery and exploration -- Russian.

North Pole -- Discovery and exploration.

Explorers -- Soviet Union -- Biography.

Sviatoī muchenik Foka (Ship)

Siedov, G. ĪA. 1877-1914.

Hospitals -- Administration -- Study and teaching.

Underground reservoirs -- United States.

Petroleum -- Geology -- United States.

Geology, Stratigraphic.

Sandstone -- United States. Sandstone reservoirs and stratigraphic concepts - selected papers.

-

no. 7-8.

AAPG reprint series ;

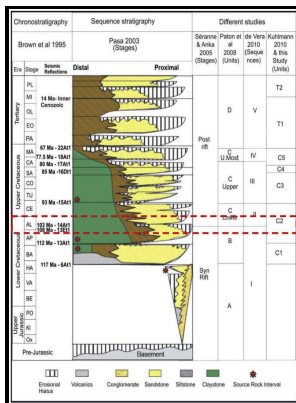

no. 7-8

AAPG reprint series, Sandstone reservoirs and stratigraphic concepts

- selected papers.

Notes: Includes bibliographies.

This edition was published in 1973

Filesize: 46.19 MB

## Reservoir Sedimentology

Geological Society, London, Special Publications, 50, 399-416. In: Geological Atlas of the Western Canada Sedimentary Basin. .

## Facies Architecture of the Fluvial

However, northwestward and westward thinning of the Joli Fou as a consequence of an unconformity at the base of the Viking, as suggested by Stelck 1958 and Beaumont 1984, is not consistent with the relationship depicted here, where the unconformity is shown to be at the base of the Joli Fou Formation Fig. Synthetic seismograph based on logs in Miano-02 well. The study will have impact on active oil and gas exploration, in the light of hydrocarbon discoveries in Jurassic carbonates both in Morocco and in the conjugate basins of Canada.

## Unconventional Petroleum Geology

Research Council of Alberta, Bulletin 21, 270 p. . Universal capillary pressure curves were generated from 22 core plugs in Malaysia, using actual core data.

## Reservoir Sedimentology

Trap efficiency of reservoirs, Transactions American Geophysical Union. Despite the long history of oil and gas exploration and an attractive petroleum policy, the sedimentary basins still contain sizeable areas, classified as frontiers, which cover more than 60% of the total prospective area including the Pishin Basin, the Maluan-I Charan Basin,.

## Sandstone Reservoir

Advances in hydrocarbon technology and petroleum development systems have recently made the exploration of unconventional hydrocarbons—such as shale gas, tight sandstone oil and gas, heavy oil, tar sand, and coalbed methane—the hottest trend in the petroleum industry. Reinson -

## **Reservoir Sedimentology**

. Regional structure and development of the Peace River Arch, Alberta: a Paleozoic failed rift system? In northern Saskatchewan, the Viking attains thicknesses of 40 m toward the west and is characterized by marine, coarsening-upward sequences similar to central Alberta ; however, in southeastern Saskatchewan, the Viking succession is much shallier, has a tendency to fine upward, and displays marine shelf characteristics Simpson, 1975. The project commenced in 2006 with a PhD undertaken by Mustafa Karer and supervised by Prof Jonathan Redfern, and was extended to include a field based study led by Dr Stephane Bodin and Prof Jonathan Redfern, with PhD student Jonathan Wood.

## **Reservoir Sedimentology**

Author: Dale Allen Leckie Publisher: Calgary : Canadian Society of Petroleum Geologists ISBN: STANFORD:36105002771405 Category: Oil fields Page: 160 View: 798 INTRODUCTION Fluvial - deltaic sandstones are responsible for about 45 % of producing hydrocarbon reservoirs in the.

## **Sandstone Reservoir**

Although this map is generally correct in a regional sense, the recognition and delineation of an extensive unconformity at the base of the Paddy, combined with documented vertical facies succession variability from estuarine to fluvial to coastal plain deposits, indicate a much more complicated depositional history, discussed later in this chapter. The fluvial channel unit generally shows a sheet-like sand body, the thickness of an individual unit is from 0.
