Phase II Environmental Site Assessment and Remedial Planning for the Coal Avenue and Puerco Drive Brownfields Property

Analysis included volatile and semi-volatile petroleum hydrocarbon compounds, chlorinated solvents, and heavy metals.

What is a Phase I and a Phase II Environmental Site Assessment?

Transformers that are not labeled as not containing PCBs are suspect.

Phase II Environmental Site Assessment and Remedial Planning for the Coal Avenue and Puerco Drive Brownfields Property

He expressed hope that participants will do justice to the environment action plan. They are also an integral part of the decision-making process for lending and property purchase decisions. The value of an environmentally-impacted property can be greatly reduced by the cost of a potential cleanup.

What is a Phase I and a Phase II Environmental Site Assessment?

One of the first needs is to consult with the dry cleaner on what the goals are, what the needs could be, and the costs associated with the range of possibilities for an initial Phase II ESA. The National Environmental Agency NEA and other stakeholders in the promotion and protection of environment yesterday validated The Gambia Environmental Action Plan GEAP phase ii for the 10 year period 2009- 2018.

Environmental Review Process

To address the RECs identified during a Phase I ESA, we performed a Phase II assessment that included preparing a Quality Assurance Project Plan QAPP Addendum since the project was federally-funded that integrated the conceptual site model and sampling and analysis plan SAP.

Stormwater Phase II Final Rule Fact Sheet Series

Biological testing is compared to outdoor ambient conditions while chemical analytical results are compared to indoor air quality health standards.

Carleton Environmental Advisory Committee enters Phase II of the Climate Action Plan review process

While this common terminology is not accurate, it does convey a step further in the process of determining whether a dry cleaner has affected a piece of property.

Environmental Review Process

Some of the tests that may be performed include: Collection of surficial soil and water samples An example where this type of sampling would be conducted is where there was an oil stain on the soil or a sheen on a puddle of water. Geophysical testing for buried tanks and drums Geophysical testing can be used to locate buried tanks or drums. He has a strong knowledge of state and federal regulations, insurance law, RCRA, and CERCLA.
