Health Promotion Principles

Therefore, we should be cautious of generalizing our findings. These papers revealed that nurses had knowledge of community-orientated health promotion: they were expected to use health surveillance strategies, work collaboratively with other professionals and groups and respect and interact with different cultures. Health Education for Nursing Health Promotion Strategies Health education is one of the most effective methods for promoting wellness as the target group must know what it should do for it to live a healthy life.

Pender's Health Promotion Model

It helps them to determine the areas requiring them to provide more information.

Nursing Health Promotion Strategies

Concepts and examples of organizational culture associated with health promotion activities. The concept of health promotion was developed to emphasize the community-based practice of health promotion, community participation and health promotion practice based on social and health policies. According to these papers nurses implemented a range of types of health promotion activity and applied different health promotion expertise across a wide range of nursing contexts.
