They are most often found in relatively permanent workholders; workholders not subject to drastic changes. Threaded inserts provide a way to strengthen threaded holes in new workholders where repeated use may cause excessive wear, such as with aluminum or other soft fixture plates. Rotating modules are also available for these columns to allow rotation of the workpiece in either the horizontal or vertical axis.

Design principles of Jigs and Fixtures

The web thickness of these sections is proportional to the overall size, ranging from This feature eliminates the cost of special taps for threading the mounting holes.
