Forced

Precision seeding simply reduces the cost and increases the reliability of crop production. Change the wash water regularly when washing fresh produce.

Rapid and user

Your objective should be to have your land producing as much as you can grow and to harvest and market throughout the year. Our results suggest that there is no regular relationship between mutation efficiency and the expression level of Cas9 and sgRNA in tomato. Ethylene gas increases the rate of ripening of mature fruits and vegetables, and shortens shelf-life.

Vegetables Produce Facts English

For example, strawberries and broccoli require near-freezing temperatures whereas summer squash or tomatoes would be damaged by such low temperatures. However, the refrigeration capacity of the room may need to be increased to compensate for the rapid removal of heat from the produce. We then verified the feasibility of assembling two to eight sgRNA cassettes into Cas9VL within 1 h.

EFFECTS OF CURING AND COOLING REGIME ON ETHYLENE PRODUCTION AND STORAGE BEHAVIOUR OF KIWIFRUIT

A small well can be used to fill a holding pond in areas or low groundwater supplies.
