Thoracotomy: Procedure, Side Effects, and Recovery

Normal valve function allows blood to flow with proper force and in the right direction. When will I leave the hospital? The amount and character of sputum is noted and recorded. Try to hold the position for 5 seconds.

Cardiothoracic Surgery

The surgeon operates while watching the video from the thoracoscope on high-resolution monitors in the operating room.

Cardiovascular and Thoracic Surgery

The lymph nodes near the esophagus and stomach may also be removed. He is board certified in both internal medicine and medical oncology. Description Thoracic surgery is usually performed by a surgeon who specializes in either general thoracic surgery or cardiothoracic surgery.

Thoracic Surgery Department

These will help to relieve the pain on the side of your surgery. The disease usually starts in the walls or air sacs of the lungs and, if left untreated, can spread to other parts of the body, including the lymph nodes, bones, and organs. Which surgery you have depends on the stage of your cancer.
