## Evaluating inputs of heavy metal contaminants and phosphorus to lake ontario from Hamilton Harbour

Past and present uses of Hamilton Harbour were inventoried and baseline data was collected. Both approaches are relevant in assessing the desirability of investment in control measures.

## Inorganic Contaminants in Suspended Solids from Hamilton Harbour

Environmental Pollution 2021, 270 , 116083.

## Full text of of Proposed Remedial Action Plans for Hamilton Harbour Final Report and

Organic Geochemistry 2010, 41 10 , 1146-1155. For swimming, established in this study as a key end use, selection of the most appropriate water quality parameters, background data characterizing loads and receiving water concentrations, and modelling analysis of response of the harbour to control are essential. Heavy Metal Contamination in Sediments of Lake Nahuel Huapi, Nahuel Huapi National Park, Northern Patagonia, Argentina.

## Impact of contaminant exposure on resource contests in an invasive fish on JSTOR

The purpose of the study was to measure the increase in total consumer surplus which would accrue from a 25% reduction in phosphorus at all six lakes.

## Heavy Metal Contamination in Sediments of Lake Nahuel Huapi, Nahuel Huapi National Park, Northern Patagonia, Argentina

The second approach measures the economic impact of the proposals by analysing the direct and indirect expenditures made as a result of

implementing the control measures and improving conditions in the Harbour, and estimating the associated increases in income and employment which accrue to residents of the target area.

### **Dissolved Metal Concentrations and Suspended Sediment in Hamilton Harbour**

Quantification of Mutagens and Other Organic Compounds. The purpose of the report is to assess the economic consequences of various measures which would have the effect of improving or enhancing water conditions in the Harbour. This assessment is based on data generated in the Phases 2 and 3 reports. Musa Bandowe, Prakash Srinivasan, Martin Seelge, Frank Sirocko, Wolfgang Wilcke.

### **The effect of divalent metals and laminar shear on the formation of large freshwater aggregates, Hydrobiologia**

The sampling sites at ArcelorMittal Dofasco G. However, the lack of a relationship between reported emissions and air concentrations measured in the vicinity of those sources indicates the need for follow-up work, in particular at facilities where the air concentration measurements suggest much higher emissions than reported.
