These gender roles tend to perpetuate the power inequalities that they are based on. At the first indication of unwillingness, sexual advances were to stop without pressure or harassment. Ironically, the demographics of rape are far from this myth, although there is evidence in the United States at least that where the victim is white and the alleged perpetrator is black, the rape is more likely to be perceived as real and sentences tend to be higher.

## The Fascinating Truth About Women and Sex Over 50

So when people think, Who do I want to work with? They are our feminisms in practice. In hospital medicine, the numbers of women doctors working part time have increased over time; but the actual proportion of women hospital doctors choosing to work part time has reduced from 39% in 1975 to 24% in 2013. This article has been updated to better reflect Benenson's characterization of her academic isolation.
