Tags: #9. #Marine #birds

**Podiceps auritus**

Bellingham, Wash: Huxley College of Environmental Studies, Western Washington State College.

**Puget Sound**

With doing so, the shells of the said invasive species of water snail will slow down the runoff and will reduce the flow of stormwater which will in turn reduce flooding and potential environmental damage.

**Invertebrates of the Salish Sea**

The maintained by Canada's Department of Fisheries and Oceans is the best place to check for recent reports in the Pacific Northwest. The site is still in development and so some links are sparse or not yet completed.

**Invertebrates of the Salish Sea**

Filesize: 42.97 MB

Non-breeding In its wintering range the species frequents coastal inshore waters 1 up to 10-20 m in depth 2 including sheltered bays 1, lagoons and estuaries 4. More than 10,000 and rivers drain into Puget Sound.
