Thomas makes the following observations about the relationship of substances and accidents: As the essence of some universal species is related to all per se accidents of the species, so the essence of the singular is related to all the proper accidents of that singular; all the accidents found in it are of such a kind: since those are made proper to things by virtue of that in which things are individuated.

What is a Worldview?

Sartre uses the consciousness of human beings as an example; the consciousness of an individual is the for-itself and the non-conscious being represents the in-itself. Nor ought one to think that the six days at the beginning of Genesis literally refer to God's acting in time, for God's creative act is instantaneous and eternal.

Metaphysics

Omens are obscure signs of future, whose meaning may not be clear until the last iteration has played out.

CATHOLIC ENCYCLOPEDIA: Dualism

During his first decade at Columbia Dewey wrote a great number of articles in the theory of knowledge and metaphysics, many of which were published in two important books: *The Influence of Darwin on Philosophy* and *Other Essays in Contemporary Thought* 1910 and *Essays in Experimental Logic* 1916. Thus statements about the future e.
