## Ten incredible underwater discoveries that have captured our imagination

According to Lonely Planet, these hidden cave locations make for the perfect and Instagram worthy swim, and are formed by the collapse of porous limestone bedrock. Built during the Eastern Han Dynasty, the architecture is impressive and the detailing remarkable, but what makes this city truly fascinating is the eerie feeling it now commands because it is sunken.

## The Archaeology of Europe's Drowned Landscapes

These villages were once home to around 6,500 people, and some of the communities who lived in these now-underwater locations date back to the American Revolution. As such the site offers major new insights into the workings of Mycenaean society.

## Submerged 7,000

And a new discovery shows that even in prehistory, coast-huggers were building these defenses, too.

## 12 Great Underwater Discoveries

A portion of the provincial Highway 2 in the area was flooded; the highway was rebuilt along a Canadian National Railway right-of-way in the area. She is an expert on lithic technology and archaeological computing.
