

# Anthropogenic influences on Sediment Discharge to the Coastal Zone and environmental consequences

s.n. - Anthropogenic sediment retention: major global impact from river impoundments

Description: -

-Anthropogenic influences on Sediment Discharge to the Coastal Zone and environmental consequences

- Reports and studies -- no. 52.

GESAMP reports and studies -- no. 52 Anthropogenic influences on Sediment Discharge to the Coastal Zone and environmental consequences

Notes: Includes bibliographical references (p. 51-66).

This edition was published in 1994

## Frontiers

This has resulted in a saline intrusion and salinization of the western part of the wetland, ever since the 19th century. Future indirect pressures from sea level rise SLR rates will affect the vulnerability and sustainability of river deltas. Agricultural intensification and oil palm monoculture threaten the natural wetland habitats and biodiversity.

## Environmental impact in the sea and marine pollution

A third 36% of the land in the United States that is less than 3.

## Frontiers

Poaching, illegal hunting and overfishing are further activities in the Ichkeul wetland ecosystem

## Reading: Human Modifications of Coastal Processes

Activities such as hardening of shorelines are now strictly regulated.

## Anthropogenic sediment retention: major global impact from river impoundments

The lagoon is shallow mean depth 1. There is a decrease in provisioning ecosystem services, e.

## Environmental impact in the sea and marine pollution

Fermentation of coconut husk for coir manufacture is carried out extensively on the surface waters of the lagoon.

## **Reading: Human Modifications of Coastal Processes**

. These activities have resulted in pressures on the wetland. Specifically, ENSO years often correspond to low precipitation, resulting in low WD and SL.
