## Static Systems Bedhead Services Trunking

Exposed pipelines should not be installed in the lift shafts, kitchens, laundries, boiler houses, generators rooms, incinerator rooms, storage rooms designed to house combustible materials or in any other fire risk area. This, in turn, is projected to bring increased levels of maritime activity to the region.

## Memoranda

Other Fittings Other fittings for connections to copper pipes, for example valve and control panel fittings, may be of copper, brass, gunmetal or bronze to the appropriate standards.

## Bedhead services: technical design manual (Welsh version)

Please refer to that memorandum for more information.

## Method statement for the Installation of Medical Gases System in Hospital Project

Applicable to the range of engineering services and equipment provided at in-patient areas and bed spaces within healthcare premises. Its work included setting national standards, shaping the direction of health and social care services and promoting healthier living.

## Bedhead services: technical design manual (Welsh version)

History Published 19 March 2013. Only where the cut pipe has either deformation or a burr which is significantly restricts the flow of gas will be deburred if necessary. The Construction Information Service brings together a comprehensive collection of essential technical documents from a wide range of publishers in one online package.

## **Bedhead services**

This is specifically for gunmetal fittings which, if cooled or quenched from the brazing temperature by dipping in cold water, could crack. Publications included Space for Health: Technical Manuals, as well as the Health Building Notes, Health Technical Memorandums, and White Papers. NBS is part of RIBA Enterprises Ltd.

### **Bedhead services by Department of Health: Estates and Facilities Division**

Other installation processes Oxygen-free nitrogen should also be used internally on pipework as in paragraph above whenever annealing or hot forming of pipework is carried out. Service ducts or voids containing medical gas pipelines should have adequate Ventilation to prevent gas concentration in the event of any leakage occurring. Latest version of document Abstract Covers the management policy for, operational management of, and design considerations for bedhead services.

## **Bedhead services**

Health Facilities Scotland is a division of National Services Scotland and provides operational guidance to NHSScotland bodies on a range of healthcare facilities topics. For patient convenience, control of lighting can be provided from the nurse call hand unit; enabling the patient to take charge of lighting levels in their immediate environment.
