

# Changing styles of inspection - a study of three types of inspection in one school

[University of Surrey] - From inspection to quality: Ways in which school inspection influences change in schools

REFRAMING ORGANIZATIONS TEST BANK

Chapter 1  
TrueFalse

1. The structural frame sees organizations as factories.
2. The primary sources of managerial "chickenism" are personality disorders and IQ.
3. Furies are also called maps, mental models, cognitive lenses, schema, and mind sets.
4. The explosive technological and social changes of recent years have simplified our lives and made us more efficient.
5. The most effective managers choose a single perspective or frame, and become highly-skilled specialists.
6. According to Hobson and Dost, "multiframe thinking" typically leads to confusion and poverty.
7. Modern organizations rely too much on an artistic approach to management and too little on an engineering approach.
8. Hobson and Dost argue that most managers and leaders have trouble understanding complex systems because they lack the right intelligence, but because they are unable to think in multiple perspectives.

Answers

1. T/F 15) While the structural frame sees organizations as factories and machines, the human frame sees them as living organisms, and the symbolic frame sees organizations as caravans, temples and theaters.
2. T/F 16) The primary source of managerial "chickenism" is personality disorders, and IQ.
3. T/F 17) Hobson and Dost argue that most managers and leaders have trouble understanding complex systems because they lack the right intelligence, but because they are unable to think in multiple perspectives.
4. T/F 18) - All of the images brought to mind by these different labels help to illustrate the sense of isolation or it encourages the reinterpretation of those situations that do not conform to the dominant frame.
5. T/F 19) - These explosive technological and social changes have produced a world that is far more complex than ever before.
6. T/F 20) - Forms of management and organization which were effective a few years ago are no longer effective.
7. T/F 21) -
8. T/F 22)

Multiple Choice

Description: -

-Changing styles of inspection - a study of three types of inspection in one school

-Changing styles of inspection - a study of three types of inspection in one school

## 2019 Ofsted Framework

They also show what an earlier inspection team concentrated on and what areas it did not inspect.

Single

It is recommended that product be enclosed within an impervious package.

## 2019 Ofsted Framework

Both research and anecdotal reports confirm that most injuries in the child care setting are cuts, scratches, and abrasions caused by falls indoors and in playgrounds. If abuse does occur, though, parents must be aware of several signs that are cause for concern.

## 13 Indicators of Quality Child Care: Research Update

The rate of injury in 91 small family day care homes was essentially the same as that in 42 larger day care centers; relative rate 1. Prospective cohort study of children in a sample of licensed day care facilities. Reduced testing may be appropriate once control has been established.

## Who Verifies Repairs After The Home Inspection?

An eight-point plan is suggested for centers to use when confronted with aggressive behavior. Lubricants shall be applied to food-contact surfaces that require lubrication in a manner that does not contaminate food-contact surfaces.

## What Happens During a Section 8 Inspection?

Write a paragraph in which you describe what the results show. FA 238: Sandboxes shall be constructed to permit drainage, shall be covered tightly and securely when not in use, and shall be kept free from cat or other animal excrement.

### **Types of Maintenance: The 9 Different Strategies Explained**

Next, the latest empirically-based research that demonstrates the importance of the indicator and any noted gaps in the research literature are listed. Summary: Examined 718 infants, toddlers and preschoolers who were enrolled in 120 child care centers from Massachusetts, Virginia, and Georgia to determine the effects of quality of care on childrens social outcomes.

### **Effective Workplace Inspections : OSH Answers**

Immunizations are both a process indicator and an outcome indicator, which help protect children not just during childhood but for the rest of their lives. Two very important studies regarding illnesses in child care that have been conducted by the Washington Department of Public Health and the Centers for Disease Control and Prevention MacDonald et al.
