## Geology Of Rockcastle County Kentucky

These maps are property of Geology. The database was developed as a contribution to the National Cooperative Geologic Mapping Program's National Geologic Map Database, and is intended to provide a general geologic setting of the Yucaipa quadrangle.

## Geologic map of the Ivyton quadrangle, eastern Kentucky (Map, 1969) [tech.radiozamaneh.com]

Capping the Bangor Limestone is the Pennington Formation. Vernon Quadrangle is a fault that extends from the western boundary of the quadrangle across to near the eastern edge where it breaks up into a swarm of smaller faults. This report presents the results of the USGS Mineral Resources Program activity to compile a national-scale geologic map database to support national and regional level projects, including mineral resource and geoenvironmental assessments.
