### Information theory

One of the major challenges in modern cancer therapy is the adaptive response of cancer cells to targeted therapies: initially, these therapies are very often effective, then adaptive resistance occurs, allowing the tumor cells to proliferate again. } In other words, this is a measure of how much, on the average, the probability distribution on X will change if we are given the value of Y.

### Information Foraging: A Theory of How People Navigate on the Web

The interpretation is that when mutual information is absent, marginal distributions are independent and their entropies add up to total entropy. The analysis of these mechanisms is limited by the complexity of cause and effect relationships that are extremely difficult to observe in vivo in tumor samples.
