Scope of nursing and midwifery practice framework

Even now the central concern of nursing is nurturing the human beings.

NMBI

Introduction This Framework provides guidance to all nurses and midwives in determining their roles and responsibilities in relation to the provision of safe, quality patient care. In providing care to the patient the nurses implement a nursing care is based on initial condition of the patient. In a sense there is a return to the beginning of nursing that is before it becomes a recognized occupation.

Scope of nursing and midwifery practice framework

Nurse and midwife prescribing is another example of a relatively recent and significant change in the scope of practice.

Framework, scope and trends of nursing practice

Nurses and midwives are, therefore, required to be proactive in identifying areas where an expansion in their scope of practice would lead to improvements in patient outcomes and in the quality and range of available services.

Nurses', midwives' and key stakeholders' experiences and perceptions of a scope of nursing and midwifery practice framework

Certain areas of a hospital care most technologic than others.

Nurses', midwives' and key stakeholders' experiences and perceptions of a scope of nursing and midwifery practice framework

Key issues in reviewing the scope of practice include notions of specialist and advanced practice, accountability, autonomy, competence, supervision, continuing professional development and delegation. Design: A mixed methods approach was used.
