Microsurgical reconstruction in giant

Marjolin's ulcer of the popliteal region.

Cancer patients have been identified as a particularly vulnerable patient population.

[PDF] Microsurgical Flap Reconstruction of Soft Tissue Defects of the Head and Neck Following Cancer Ablation

This is made possible by a high-powered microscope that lets surgeons disconnect and reconnect vessels less than half a millimeter in size. Good features of the plastic material contributed to the total self closure of salivary fistula in 1 patient. Petit JY, Rietjens M, Lohsiriwat V, Rey P, Garusi C, De Lorenzi F et al 2012 Update on breast reconstruction techniques and indications.

Microsurgical reconstruction in giant Marjolin's ulcer of the popliteal region.

Lohsiriwat V, Peccatori FA, Martella S et al 2013 Immediate breast reconstruction with expander in pregnant breast cancer patients.

Microsurgical Breast Reconstruction Sought by More Patients

Early complications were classified as occurring during the initial hospitalization and requiring intervention.

Microsurgical Reconstruction Of The Cancer Patient Books PDF Book

We performed a latissimus dorsi muscle flap to cover the defect Figure 2b. Data collected from the medical records included tumour and treatment characteristics, postoperative complications, and survival.

PP151: Microsurgical reconstruction of tongue in cancer patients

An intraoperative aspect of the tissue defect a and the muscle flap latissimus dorsi flap b Caption: Fig. SIEA Like the DIEP, the flap provides the same abdominal skin and fat, but it relies on a different blood supply and requires less surgical dissection than the DIEP flap.
