## Excess mortality during the Coronavirus pandemic (COVID)

For most low- and middle-income countries, such data is not available for previous years.

## Exodus 33 NIV

For example, countries with older populations — which have a higher mortality risk, including from COVID-19 — will tend to have higher all-age P-scores by default. Excess mortality can only be calculated on the basis of accurate, high-frequency data on mortality from previous years.

## What Does The Name Exeus Mean?

Why is it informative to look at P-scores for different age groups? Important points about excess mortality figures to keep in mind The reported number of deaths might not count all deaths that occurred. Then Moses would return to the camp, but his young aide Joshua son of Nun did not leave the tent. We make the data used in our charts downloadable as a complete and structured.

Characters are presented in a pixel art style.

## Exodus 33 NIV

You were born somewhere around the territory of USA South-Central approximately on 1250. This undercounting might be exacerbated by the pandemic because people over age 65 have an elevated risk of dying from COVID-19.

## Excess mortality during the Coronavirus pandemic (COVID)

The excess mortality includes not only those who have died from COVID-19, but also those from all other causes — and these numbers may also be changing due to the overall pandemic conditions.
