### Ingredients for Making Natural Insect Repellents for Outdoor Plants

Click EDIT to write this answer. So, I am wondering if it would be safe to use the organic oil to rub on your bodies to kill scabies. Isopropyl myristate is a common cosmetic compound that does double duty as an emollient that also kills lice, fleas, and ticks by dissolving the wax that covers their exoskeletons.

### 6 Dog

Others are only appropriate for uses that do not require direct contact with human skin. Many mosquitoes are simply a nuisance, but others carry diseases that could harm or even kill humans.

### Ingredients for Making Natural Insect Repellents for Outdoor Plants

You can also make soap sprays.

### Natural Flea, Tick, Fly & Mosquito Repellent for Dogs and Their People

Evidence suggests that catnip may outpace DEET with this approach. Natural home brew repellent would be great. You can also use spray on your clothes if needed.

### 6 Dog

Would this work since I do not have the oil? Spot test on a small area, or spritz on clothing instead of directly on skin. Leave a comment and let me know! We put goldfish in our rain barrels! Using patchouli oil may be the most practical application, but the plant is also known to discourage mosquitoes from lingering. Homeowners who want to use PMD will likely notice a greater effect.
