strategies

The study employed both primary and secondary sources of data collection such: as survey design, interviews and journal reviews.

Coping Mechanism Among Unemployed Graduates (PDF)

The model proposed that stress involves interaction between individuals and their environment in which demands exceed their resources and threaten well-being. Individuals who are employed are more mentally fit and may avoid negative behaviours such as use of alcohol and drugs to cope with stress. Since then, migration involves trespass on privately held land.

Coping with Firewood Scarcity in Soroti District of Eastern Uganda

Carbon sequestration in arid-land forest. The exchange of laborers also, would provide further growth opportunities and space for acquiring modern skills for coping up with the tough competition effectively. The use of highly active antiretroviral therapy HAART has transformed HIV
