Cretaceous Atlas of Ancient Life

Pteranodon fossils are very common; it was probably a major component of the surface ecosystem, though it was found in only the southern reaches of the Seaway.

BEST WESTERN SEAWAY INN \$76 (\$11101111)

North Dakota Cretaceous Western Interior Seaway stratigraphic units in North Dakota. Reefs are a fascinating fusion of biology and geology. The north-south configuration of the WIS and the influence of southern Tethyan and northern Boreal water masses on the sedimentological, geochemical, and paleontological character of the seaway created a unique geological record with cycles of enhanced organic matter concentration that are key for hydrocarbon productivity prediction in Texas and the Gulf of Mexico.
