8.7 Central Asia and Afghanistan

The smallest daily range in the north is when the weather is cold; the greatest is when it is hot. Nomads make up a sixth of the population along with three-fourths of Afghanistan workers who farm the land.

Political Map of Afghanistan

Afghanistan, known since ancient times for its lapis mines, is divided by several mountain ranges. Kabul is the largest city and also the capital of Afghanistan. The central and western regions have mainly arid desert climates and rely heavily on the fresh water flowing in from the mountains.

Afghanistan

This line continues on through mountainous regions to the area. In 2007 international organizations provided a large share of medical care.

Afghanistan geography, maps, climate, environment and terrain from Afghanistan

In the eastern highlands, settlements are grouped; stone and timber are common building materials.
