reproductive healthcare and where any woman can take her own decisions free from discrimination and coercion.

Equity and Inclusion: The Roots of Organizational Well

Most major aid organizations working on governance reform remain wary of casting accountability, transparency, participation, and inclusion as rights rather than desirable programming attributes or principles. The study settings include three low-income countries Burkina Faso, Mali, Sierra Leone and two lower-middle countries Kenya, India.

Accountability in development organizations : experiences of women's organizations in India : Smith

Because it's the women who build a home, a society and ultimately a nation. Accountability programs that seek to reduce state capture may actually try to limit participation in the workings of certain institutions, such as central banks, in order to isolate them from political pressure or improve efficiency.

Equity and Inclusion: The Roots of Organizational Well

Portfolio analysis is a systematic way to analyze the array of services that are conducted by a NGO. Driven by the hopefulness of the immediate

post—Cold War years, policymakers in the 1990s initially embraced this argument primarily axiomatically rather than on a firm empirical basis. Community members and health facility staff discuss the contents of the scorecard and develop an action plan to identify solutions.

[Women's organizations in India]

For example, in one of our team workshops, we developed a unique codex based on the word PERFORM.

Diversity Accountability Requires More Than Numbers

Participatory measures can be part of broader vertical accountability efforts relating to public financial management and service delivery, forming an integral element of citizen attempts to exert a disciplinary role vis-à-vis the state. Developing country power holders were unconvinced by the instrumental case for anticorruption work, fully aware that many developed countries had in fact experienced substantial corruption throughout their own histories, yet still managed to reach prosperity. Some transparency programs are narrowly designed to make government data more easily accessible to private sector and other stakeholders and do not attempt to consciously link these transparency mechanisms to accountability or participatory processes.

Women In Business: Organizations And Associations In India

Although more and more organizations are taking steps toward greater diversity, equity, and inclusion DEI in the workplace, people of color feeling undervalued, unsafe, and exhausted from navigating unwelcoming work environments. With the help of the above planning tools and planning principles, strategic thinkers of an organization can move ahead to the different stages of strategic planning process. One of the key activities of Amnesty International is fight against violence against women and advocacy for gender equality.

Accountability: Five Myths That Could Be Holding You And Your Organization Back

However, the political will to translate such commitments into substantive political reform is often lacking.
