TPWD: Bird Migration Nearctic

H5N1 highly pathogenic avian influenza in Southeast Asia.

Species Summary

As in previous studies for birds, for mammals, and for multiple taxa , we found little congruence between areas with high richness, endemism and threat for migratory bird species.

Species Summary

Jump dispersal is important within the order in the last 30 My, but vicariance is the most important cladogenetic driver of disjunctions at deeper levels of the phylogeny. Spatial Data Data on the distribution of bird species were derived from BirdLife International and NatureServe 2011 , a global dataset compiled as part of the International Union for Nature Conservation IUCN Red List assessments for birds.

Species Summary

Also see Jackman and Scott 1975 , Braun 1994 , and Keppie and Braun 2000 for more extensive ecological and life history summaries. The Institute for Bird Populations, Point Reyes Station, CA. Although lower data quality may result in an underestimation of the total number of birds in the tropics and in the Southern Hemisphere, it would be necessary for hundreds of migratory species to be unmapped for the observed asymmetrical patterns to be offset.

Mapping Global Diversity Patterns for Migratory Birds

The Institute for Bird Populations, Point Reyes Station, CA.

Fall stopover strategies of three species of thrush (*Catharus*) in northern South AmericaEstrategias migratorias otoñales de tres especies de *Catharus* en el norte de Sur AméricaFall stopover strategies of *Catharus*

During the non-breeding seasons of 1973—74 and 1974—75 Oehlenschläger, Ramos, Rappole, and Warner conducted the first intensive mist-netting efforts in the area.

Influenza A Viruses from Wild Birds in Guatemala Belong to the North American Lineage

A transition zone where the difference in species richness between seasons is small or null mapped as a pale line in is found around latitudes 30° to 40° N, crossing North America, the Mediterranean region, Central Asia, the Himalayas and Southern China. Ehlers J, Gibbard PL 2007 The extent and chronology of Cenozoic global glaciation. Peter F Surai has his expertise in Animal and Human Nutrition and published a number of papers as well as two books Natural Antioxidants in Avian Nutrition and Reproduction, 2002; and Selenium in Nutrition and Health, 2006 which became textbooks for animal nutritionists.

The influence of migration patterns on exposure to contaminants in Nearctic shorebirds: a historical study

Los estudios de largo plazo en una variedad de regiones, especies y períodos de tiempo pueden ayudar a vincular las tendencias en el clima con los cambios en la fenología de las aves y brindar un mejor entendimiento de los efectos potenciales del cambio climático. Therefore, it is now timely to complement this exciting information with detailed field research that documents the behavior of birds on the ground and in important stopover areas , , . In Venezuela, recorded in northern mountain habitats, including paramos, open fields with scattered trees, savannas, second growth, and wheat fields.
