Tillage and No

A recent journal article explores how a long-term tillage study in northeast Nebraska can offer insights on successfully adapting to future climate changes by adjusting specific management practices.

CT

Crop production where little or no tillage occurs defines conservation tillage.

CAB Direct

Residue is removed from the tilled zone at the time of strip tillage and corn is planted into the residue-free area.

Tillage methods and soil and water conservation in southern Brazil

Objectives of Tillage : i Adequate soil aeration for gaseous exchange in the seed and root zone. Hence, they plant the seeds without preparing the soil, directly in an un-plowed field. Mulches are also applied in narrow slots vertical mulching instead of spreading on soil surface.
