Cognitive Science

Consider the following simplified version of the cognitive science of learning to draw some important implications on what should happen in organizational learning.

Culture and Cognitive Science (Stanford Encyclopedia of Philosophy)

These are skills or cognitive abilities that require using the brain to process information.

Rita Nolan, Cognitive Practices: Human Language and Human Knowledge

Advanced Neural Signal Processing 4 Mathematical foundations and applications of neural signal processing techniques used in electrophysiology and neuroimaging including microscopy , covering spectral analysis, correlation, high-dimensional data, and spike-train analysis. Language 4 An introduction to structure of natural language, and to the cognitive processes that underline its acquisition, comprehension, and production. It should be explicit in line with the borrowing and reorganising principle.

cognition

This is sometimes done through active suppression. That's close in spirit to the idea that perception is theory-laden, which was the central thesis of New Look psychology—the theory that the modularity hypothesis is supposed to challenge Bruner, 1957; Hanson, 1958. The most basic hierarchy is danger.
