### Ideas for Building an Online Community

It enables students, for example, to click on a region and automatically view numerical data. Teachers need to tell students what they are doing well and ask provocative questions to stimulate further learning. In other words, a differentiated classroom provides different avenues to acquiring content, to processing or making sense of ideas, and to developing products so that each student can learn effectively.

### Dealing with Loud, Playful, and Difficult Students

Used together, these tools can help students see patterns clearly and interpret them in light of the intended learning outcomes by focusing their observations and cueing them to interpret data in scientifically viable ways.

### Pedagogy of Play

Scaffolding Conceptual Models Instructional supports can be designed with conceptual models or dynamic simulations that make science concepts more transparent for learners, helping them connect their prior understandings with more sophisticated scientific understandings.

### Fostering Fun: Engaging Students with Asynchronous Online Learning

Phi Delta Kappan, 80 2 , 139-148. Mahwah, NJ: Lawrence Erlbaum Associates.

### Fostering Fun: Engaging Students with Asynchronous Online Learning

WorldWatcher is a visualization and data analysis tool that is based on tools scientists use, but it is designed for learners Edelson, Gordin, and Pea, 1999.

### Behavior Strategy: Respectful Redirection

These interventions are usually year-long collaborations between schools and researchers. Creating a sense of curiosity, even for simple concepts, engages students in a playful way.

## Search

Hillsdale, NJ: Lawrence Erlbaum Associates. They describe the interplay of first- and second-hand investigations and the support they provide for the development of scientific knowledge and reasoning. Recall that David from the Challenge is nonverbal and cannot effectively express his wants and needs.
