**Best practices in intercultural health:  
five case studies in Latin America**

Freyre Brazil , Marti Cuba , Vasconcelos Mexico , and Sarmiento Argentina. The Guatemalan experience was limited in this regard due to difficulties with the public health system. Prerequisite: Spanish 360 or 370.

**Indigenous Knowledge and Climate Change**

The first initiative undertaken in 1998 was the development of the Makewe Hospital intercultural program, owned and operated by an association of Mapuche leaders.

## Indigenous Knowledge and Climate Change

Impact refers to the notion that the initiative can demonstrate some tangible and positive health improvement on the individuals and population served or improvement for health care providers that can be measured quantitatively or qualitatively.

## Climate Change

Buying Time: The Delayed Crisis of Democratic Capitalism. However, we were able to use qualitative information to reach a tentative assessment

## Change

The first initiative undertaken in 1998 was the development of the Makewe Hospital intercultural program, owned and operated by an association of Mapuche leaders.

## Indigenous Knowledge and Climate Change

Impact refers to the notion that the initiative can demonstrate some tangible and positive health improvement on the individuals and population served or improvement for health care providers that can be measured quantitatively or qualitatively.

## Climate Change

Buying Time: The Delayed Crisis of Democratic Capitalism. However, we were able to use qualitative information to reach a tentative assessment

of positive impact in Suriname, Chile, Ecuador and Colombia. This series is offered as a public service and materials may be reproduced for research and educational purposes, provided proper citation and credit are included.

## **Climate Change**

Finally, section five evaluates the potential futures of Afro-Latino political participation. Social inequalities are said in the literature to arise in the pursuit for linear-style progress linked to growth.

### **Sustaining the ‘Good Life’: Buen Vivir as an alternative to sustainable development**

Under such a policy, colonial and corporate elites, backed by a legal apparatus and scientific methods, are able to purchase and use land that does not belong to them. These historical conditions of capitalist development, which made liberal democracy possible, simultaneously circumscribed the parameters of its constitutive domains: Liberal democracy leaves untouched the whole new sphere of domination and coercion created by capitalism, its relocation of substantial powers from the state to civil society, to private property and the compulsions of the market. This refers to principles that were mentioned by at least a third of the literature reviewed as being important in the realization of Buen Vivir.
