plummeted in recent decades, it has surged in other countries.

Inventing pollution: coal, smoke, and culture in Britain since 1800 (Book)

The was passed - and intermittently amended - to regulate irritant gaseous produced in the to make , but also the often caused by emissions from the same factories.

Inventing Pollution: Coal, Smoke, and Culture in Britain since 1800 on JSTOR

UK Department for Environment Food and Rural Affairs air quality monitoring station UK-AIR ID: UKA00362 at the nature reserve in the has long been considered a significant health issue. More significant, however, was the smoke that resulted from the widespread practice of maximizing industrial output by forcing steam boilers to exceed their design capacity.

Project MUSE

Smoke abatement societies were being established in northern industrial towns such as Leeds and Manchester from the 1840s.
