### Flashforward (TV Series 2009)

Now the book - this too follows similar lines but suddenly not only are you dealing with different characters but also a different location. I enjoyed the way Theo's arc read like a mystery novel within context of the greater story. As with quite a few people my first introduction to this book came through the show based on it.

#### Flash

The ending left me with a bit of a 'whaaat? A few super-beings who get to watch the galaxies collide hundreds of billions of years in the future? However, the concept of this book was so interesting, I was intrigued.

#### Flashforward

It was formed from the details seen by in his flashforward.

#### Flash forward

How does that affect the world? Somebody get Sawyer a thesaurus. One of the main character gives a very scientific argument that the future is set and that it can't be changed. Also, some of the science discussion among the characters I thought was ridiculous.

#### FlashForward (TV series)

Character development is crucial, and again detail is key. He's so depressed he plans his suicide.

#### Flash

The first half is about the here and now. The only problem I had with the book was the last fifty pages.
