

Solar shading of buildings

Construction Research Communications by permission of Building Research Establishment, Ltd.
- Solar shading, Sunshade

Description: -

- Africa, Central -- Description and travel.
- Probabilities
- Distribution (Probability theory) -- Mathematical models
- Natural theology.
- Income tax -- Law and legislation -- Canada.
- Canada.
- Transportation -- Washington (State) -- Planning -- Mathematical models.
- Choice of transportation -- Mathematical models.
- Cross-connections (Plumbing) -- Law and legislation -- Washington (State)
- Clothing and dress -- Social aspects
- Fashion -- Social aspects
- Rome -- History
- Buildings -- Environmental engineering
- Light in architecture
- DaylightingSolar shading of buildings

- [Building Research Establishment report] -- BR364Solar shading of buildings

Unit

This is particularly true if both global comfort and energy issues are taken into account.

Solar shading, Sunshade

Note that the hour lines are given in mean solar time. Phillips 1948, Petherbridge 1969, Koenigsberger et al. Book Description Careful choice of solar shading is required in buildings to allow good use of winter solar gain and daylighting without summer overheating.

Solar shading, Sunshade

At today, a building designer who can dispose of th is great variety of shading devices cannot rely on practical indications to understand if, given particular conditions, one system performs better than another, or rules helpful in making a choice.

What Is Solar Shading?

This shading mask, when superimposed on the sun-path diagram according to the orientation of the building , will cover all the time-points dates and hours when the point considered will be in shade Fig.
