The first stage of civilization in Greece is represented by the prehistoric mounds of Thessaly and contemporary sites in Central and Southern Greece.

Documents in Mycenaean Greek: Three Hundred Selected Tablets from Knossos, Pylos and Mycenae with Commentary and Vocabulary

Mycenaean might be a non-Greek, but closely related Indo-European language; or it could be an aberrant dialect of Greek, showing, like the

dubious remains of Macedonian, a general resemblance but considerable difference in its specific forms. The historical distribution, with dialects as widely separated linguistically as Attic and Megarian in close geographical contact, could not have arisen without considerable movements of population. Thus by a process of elimination we deduce that since neither the Neolithic nor the Early Helladic people were Indo-Europeans, that is Greeks, then the Middle Helladic people who introduced into Greece the mysterious pottery called Minyan Ware the characteristic pottery of the Middle Bronze Age were probably the first Greeks to enter Hellas.
